journal of MEMBRANE SCIENCE

Subject index

Anion-exchange membrane, 13
Anion recognition, 187
Anion transport, 187

Bacteria inhibition, 59
Borate form, 13

Calixcrowns, 73
Capillary condensation, 215
Carbon dioxide, 193
Catalytic membrane, 1
Chemical surface modification, 39
CMPO, 73
Comment, 131
Composite membranes, 39, 157
Concentration polarization, 139, 235
Concentration polarization build-up, 131
Constriction resistance, 157
Convective, 139
Coulomb efficiency, 255
Counter diffusion method, 1
Cross-flow ultrafiltration, 115
Crown-ethers, 73

Dean vortices, 235
Dense aliphatic–aromatic membranes, 51
Differential reactor, 201
Diffusion, 139
2-(*N*,*N*-Dimethyl)aminoethyl methacrylate, 193

Electrical resistance, 255
Electrophoretic mobility, 27
Emulsion liquid membrane, 171
Enzyme distribution, 201

Facilitated transport, 13, 171, 193
Fine particle, 1
Fixed carrier membrane, 193
Flow pulsation, 245
Flux decline, 115
Flux enhancement, 39
Flux recovery, 93
Fouling, 93
Fouling mechanisms, 115

Gas–liquid contactors, 235
Glucose, 13

Hollow fibers, 131, 235

Impedance spectroscopy, 51
Improved model, 157
Inorganic membranes, 115
Interpenetrating polymer network, 227
Invertase fixation, 201
Ion-exchange membranes, 105
Ion-selective electrodes, 105

Lactic acid production, 59
Lanthanide complex, 187
Liquid membrane, 187

Mean activities, 105
Mean pore diameter, 149
Membrane bioreactor, 59
Membrane permeability, 215
Membrane selectivity, 245
Mesoporous membranes, 215
Microfiltration and ultrafiltration membranes, 27
Microporous membrane, 149
Modeling, 59, 81
Modified polysulfone membrane, 201

Nanofiltration, 81
Network model, 215
Neutral carrier, 187

Organic separations, 127

Permeability, 81
Permeation model, 171
Pervaporation, 127, 227
Plasma graft polymerization, 193
Polydimethylsiloxane, 227
Polystyrene, 227
Pore former, 149
Proteins, 27, 115

Raman scattering, 1
Regenerated cellulose, 149
Reverse osmosis, 39

Salt and ionic diffusion coefficients, 51
Secondary flow, 235
Separation, 1
Sieving coefficient, 245
Silver extraction, 171
Simulation, 59
Skin, 39
SLM stability, 73
Sorption, 13
Soy extract, 93
Spiral electrodialysis, 255
Stability, 13
Streaming potential, 27
Supercritical CO_2, 81
Supported and confined microorganisms, 59
Supported liquid membranes, 73
Supported membrane, 227
Theory, 139
Transmembrane flow of water, 149
Transport influence, 201
Transport number, 51

Ultrafiltration, 93, 139, 245

Vapour transport, 215

Water–ethanol mixtures, 227
Water treatment, 127

Zeolite membranes, 127
Zirconia, 27
